Rajasthan

81.1%

Class 10th

2013 - 2014

Vivekananda Kendra Vidyalaya (CBSE),
Rishabhdeo, Udaipur

93%

ACHIEVEMENTS

- Graduate Aptitude Test in Engineering (GATE) - 2021
Secured AIR 1958 with 604 Score.
- Qualified National Level Talent Exam-I under Indian Engineering Olympiad.

FEATURED PERSONAL PROJECT

Real Estate Web App ([Live Demo](#))

Duration: Late March – Early April 2025

Built a fully functional real estate platform with both admin and user panels, implementing complete feature flows end-to-end.

- Developed using **Next.js, with Google Firebase** for authentication, database, and storage.
- Utilized **Tailwind CSS & shadcn/ui** components for accessible UI design.
- Extended Work:**
 - Implemented Forgot Password, Image Preview, and **Lazy Loading** with React Suspense.
 - Ensured fully **responsive UI** across devices.
 - Integrated **Google Maps API** for dynamic property location display.
- Deployed on Vercel and mapped to a custom domain using CNAME setup.
- Future Work** - Internationalization (Multi-lingual support)

WORK EXPERIENCE

Software Developer - Zapcom Solutions Pvt. Ltd

Location: Bengaluru | Duration: June 2023 – Present

Full Stack Developer | **ReactJS, React Native, AWS**

Technologies & Tools:

- Frontend: **React JS, Vite, React Native, JavaScript**, Redux, HTML5, CSS3
- Backend: Node.js, AWS Lambda, DynamoDB, Cognito, CloudWatch
- DevOps & Deployment: Microsoft App Center (CodePush), GitHub
- Other Integrations: Razor Payment Gateway, Firebase (analytics, debugging), WebEngage (in-app notifications)

Project:

Helpcenter Portal – Developed a support portal integrated into an existing Feedback Management System (FMS) for hotel aggregators.

Key Responsibilities:

- Led design phase and collaborated with stakeholders for clear requirements.
- Managed frontend development using **React JS with Vite**; coordinated frontend and backend integration.

Key Achievements:

- Successfully led the project, enhancing cross-team communication.

Other Highlights

- Completed Next.js & React.js course from Udemy
- Participated and led various departmental events
- Volunteered in technical fests and workshops
- Delivered college-level workshops on tech topics
- Cheerful and positive attitude
- Eager to learn new technologies
- Strong presentation and communication skills
- Highly adaptable and collaborative
- Efficient and deadline-driven
- Language Spoken - Hindi, English

Project:

Customer Loyalty SaaS Platform – Developed mobile app and admin portals for a SaaS-based customer loyalty system.

Key Responsibilities:

- Built interactive **React Native** apps aligned with UX standards.
- Integrated RESTful APIs for seamless functionality.
- Deployed mobile apps to App Store and Play Store.
- Created serverless APIs with AWS Lambda for business use-cases.

Key Achievements:

- Learned AWS serverless architecture (Lambda, DynamoDB, Cognito).
- Managed end-to-end mobile app lifecycle independently.

• Software Developer - Panorbit Services LLP

Location: Bengaluru | Duration: July 2022 - April 2023

Mobile App Developer | React Native

Projects:

- ODO World (odo.world/download/):
- Developed multilingual, interactive word-game features in React Native.
- Changeway:
- Resolved critical bugs and improved stability in a React Native application.

Primary Technologies: React Native

• System Engineer - Infosys Pvt. Ltd.

Location: Bengaluru | Duration: March 2021 - June 2022

Training & POCs:

- Full Stack Web Development (Angular JS, Java Spring Boot):
 - Fixed bugs and built new components for Experience ICETS, a solution-based portal.

TECHNICAL SKILLS

- Languages & Frameworks: React, Next.js, Node.js, Express, Java, Python
- Databases: PostgreSQL, MySQL, Firebase, DynamoDB
- Tools & Platforms: AWS, Firebase, Vercel, GitHub, Postman, VS Code, PgAdmin 4, Android Studio, Xcode

OTHER PROJECTS [\[GitHub\]](#)

• Versatile Sentiment Analyzer [\[Source Code\]](#)

Independently developed a standalone ML-based GUI app for sentiment analysis (positive, negative, neutral) with confidence scores

• Corona Updates [\[Source Code\]](#)

Built a Python web scraper to extract COVID-19 statistics from Worldometers and deliver real-time updates via SMS.

• Chatbot [\[Source Code\]](#)

Created a standalone chatbot using a dictionary-based algorithm for responding accurately to user queries.

• Online Food Delivery System [\[Source Code\]](#)

Developed a full-stack DBMS mini-project featuring online food ordering functionality with HTML5/CSS3 frontend and PHP/MySQL backend.
